People are often amazed by the Mill End Sale.

We ourselves, frankly, were surprised by the opening day of this 30th sale.

Yet we know how the sale has grown, who have had a part in that growth, and who realize all that is put into it in effort and thought and value, -we should be surprised at nothing, for we know the secret of the Mill End Sale. We know, if we but stop to think, why this 30th sale is what it is.

Into this 30th Mill End Sale, there has been put all the knowledge and all the experience gained in the 29 sales that preceded it. It is the summing up of all the knowledge and all the experience of 15 years. It is better than all its predecessors, for one reason, because it ought to be. The store would be pretty unprogressive if it did not learn by experience.

That knowledge and experience, that value which has come to be known as the Mill End value; that diversity of merchandise, that great quantity of merchandise, that price known to everybody as the Mill End price,—it is they that make the Mill End Sale. They make this 30th sale better than all that have gone before, because each of these predecessors has given its share of help to the building of this latest. The whole store has learned something each time the Mill End Sale has been held. And this 30th sale is a summing up of all that has been learned.

That is why the 30th sale is so attractive as it is, why it has started out at so wonderful a pace.

You personally will find the 30th Mill End Sale an event of economy and interest. It will pay a profit to you every time that you spend a dollar or a nickel.
